Kibbles-&-Brews

Where Man's Best Friend Meets Man's Best Beverage

User Story

So...imagine! You're this chick! With this big beautiful dog

and you're wanting to go on a puppy play

date but everyone you know has smaller dogs and

They're afraid that "Tonto", here will trample over

Ms.Johnson's poor little "TinkerLilly"!

...Well, we've got just the app for you!

What is Kibbles-&-Brews?

Kibbles-&-Brews is a user interactive app that allows people to not only find other people with size and breed compatible counterparts and playmates for their dogs, but it also allows them to blog about their beloved pets and allows user groups to find dog friendly places to gather.

How was it built?

K-&-B was built using using the following:

React JS	Axios	Bcrypt
Javascript	Node	Bulma
CSS	Cors	
Cloudinary API	Express	
Mongo/MongoDB	Heroku	
Mongoose	Dotenv	

Who Built Kibbles-&-Brews

Front End

**Austin Williams**

Paul Payton

Jason Hill

Back End

Zack White

Zac Talley

What issues did the team have?

-Team members getting sick from the flu...Zac T

-Deploying the finished product via Heroku

-Cloudinary API rendering to the DB

-Login/Passport Authentication

-Dropdown boxes on React

Whats Next For Kibbles-&-Brews?

-Google maps API implementation with all animal friendly restaurants and places to meet being marked.

-More functional Blog Capabilities

-More polished look

-Editing and updating capabilities for user profiles.

-More specific search capabilities

-to eventually transform into a full blown social media platform.

DOG GON'IT! I THINK IT'S TIME FOR A DEMO!!!!

The moment you've all be waiting for!!!!!
